## The challenge

Managing, analysing and optimising a vast number of transports worldwide and simultaneously can be challenging for a company whose core focus is not logistics.

# Automotive Exterior Industry

For Inalfa, a Dutch automotive supplier for vehicle roof systems, Ewals deploys their entire set of modular Control Tower services, e.g.: procurement, operational execution, continuous improvement and reporting. Having all transports in one Transport Management System makes them visible and the reporting activities provide transparency in costs and performance.

# Automotive Exterior Industry

A continuous improvement agenda leads to further optimisation with the aim of reducing Inalfa's transport spending. The Control Tower functions as a single point of contact, with a dedicated team and year-round personal service with a good cultural fit.

GlobalForwarding@Ewals

For part of the business, we deploy **GlobalForwarding@Ewals**. Ewals is a solid partner that transports goods from one continent to another while providing operational and financial stability. Ewals offers the customer relief by integrating and organising these movements seamlessly.

# Automotive Exterior Industry

*'Highly organized, knowledgeable, resourceful and skilled professionals are what we get working with Ewals Logistics Control as a Control Tower. This means we can focus on our core business while transport is managed from a central point. The added advantage of the Ewals Control Tower is the continuous improvement programme, which is generating annual cost savings for us.'*

Wouter Cox, Senior Specialist SCM,  
Inalfa Roof Systems B.V. Venray
